LEARN360 and ORION to Bring Ontario Schools Faster Connectivity and HD Content

TORONTO, ON (June 22, 2010) – *LEARN360*, (www.learn360.ca) Canada's leading interactive, educational media on-demand service, has joined forces with *ORION* (Ontario Research and Innovation Optical Network) to provide an enhanced user experience when accessing Learn360's library of over 8,000 videos and interactive educational material to Ontario schools at a lower cost, with higher quality and faster connectivity.

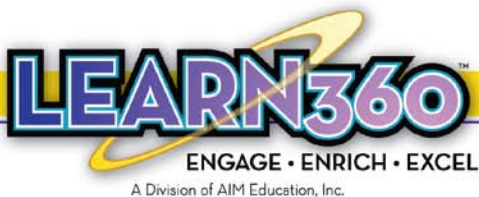

"We're delighted to work with LEARN360 and make these important resources available, at an enhanced quality, exclusively to our connected schools," says Phil Baker, ORION President and CEO. "This will be a huge benefit for Ontario students and teachers."

"Teaching and learning resources are more multi-media based and interactive and schools need the tools and capabilities to derive the full benefits of these new resources. ORION is an important part of advanced education support capabilities, and we welcome all efforts to enhance students' learning experience and give teachers the tools they need to do their job today," said Baker.

In March of this year Learn360 and Ontario's Ministry of Education entered into a multi-year agreement which offers Ontario public schools access to Learn360's online catalog of educational content. This agreement was the product of a thorough evaluation conducted by the Ontario software Acquisition Program Advisory Committee (OSAPAC) that yielded OSAPAC's recommendation of Learn360 as the provider that met and would continue to meet the expectations of the educational community.

The ORION, Learn360 collaboration will provide the 22 school boards and estimated one million students with access to ORION's fiber optic network the ability to stream and download LEARN360's superior content faster than a normal broadband connection. "Our primary mission is to provide best in class educational media, in a user friendly environment for the students and educators of Canada," stated Suzanne Hitchon, VP & General Manager of Learn360. "This relationship will provide for an enhanced experience that will contribute to the creation of a more interactive classroom learning environment."

- more -

“The impact of this relationship will be dramatic for us,” said Ken Broomer, Supervisor, Network and Network Security, Ottawa-Carleton District School Board. “By downloading high-bandwidth content over ORION, instead of the Internet, our school board will be able to deliver high quality applications without contending with limited resources on our Internet connection,” he said. “It’s a win-win.”

About ORION

The Ontario Research and Innovation Optical Network (ORION) is Ontario’s ultra high-speed research and education network. It links 1.7 million Ontario researchers, scientists, students, teachers and staff who depend on ORION for teaching and learning and to enable their research collaborations and discoveries in physics, cancer research, environmental science and technologies, social sciences and the humanities and multiple other disciplines. ORION links users and institutions to each other, and through CANARIE - Canada’s advanced research and innovation network - to high-capacity research and education networks, partners and collaborators across Canada and around the world. Visit www.orion.on.ca.

About Learn 360

With over 8,300 digital video titles, Learn360 gives educators and students the power to meet and exceed 21st century educational expectations. Setting a superior standard of quality for video streaming, Learn360 delivers the rich resources educators need to bring standards-based and differentiated instruction to students everywhere. For more information, or to sign up for a free 30-day trial, visit www.learn360.ca.
