

ORION Community Training 2020

Certified Information Security Manager (CISM) – 4 days

The management-focused CISM certification promotes international security practices and recognizes the individual who manages, designs, and oversees and assesses an enterprise's information security.

CISM certification ensures holders understand business and know how to manage and adapt technology to their enterprise and industry. Since its inception in 2002, more than 30,000 professionals worldwide have earned the CISM to affirm their high level of technical competence and qualification for top-caliber leadership and management roles.

Course outline:

Information Security Governance to establish and/or maintain an information security governance framework (and supporting processes) to ensure that the information security strategy is aligned with organizational goals and objectives.

Managing information risk in accordance with organizational risk appetite, while facilitating the attainment of organizational goals and objectives.

Developing and managing an information security program that identifies, manages and protects the organization's assets while aligning with business goals.

Information security incident management to plan, establish and manage detection, investigation, response and recovery from information security incidents in order to minimize business impact.

Outcomes:

- Identify critical issues and customize organization-specific practices to support the governance of information and related technologies
- Take a comprehensive view of information systems security management and their relationship to organizational success
- Demonstrate commitment to compliance, security and integrity.
- Ensure alignment between the organization's information security program and its broader goals and objectives

Who Is It For?

CISM focuses on the needs of professionals with 3–5 years of experience in the managing, designing, overseeing and assessing of enterprise information security.

Suited to those who are or aspire to be:

- CISOs and CSOs
- Security Directors/Managers/Consultants
- IT Directors/Managers/Consultants
- Compliance/Risk/Privacy Directors and Managers
