

Flexible Online Training

Learn. Protect. Advance.

Is your IT team prepared to handle today's cybersecurity threats?

The current global pandemic has increased the rate and range of cyber threats affecting all organizations. Security breaches can amount to millions of dollars lost, and reputational damage can be even more costly.

ORION has partnered with leading cybersecurity certification body EC-Council to provide flexible and highly cost-effective online training that supports Ontario's research, education and innovation community to advance cybersecurity skills in this challenging time.

LEARN - Study at your own pace through engaging video delivery from professional instructors with industry expertise. Final exams help you test and confirm your knowledge.

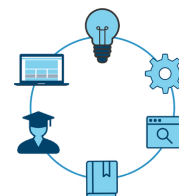

PROTECT - Defend your organization and help prevent cybersecurity attacks that threaten your valuable reputation and resources.

ADVANCE - Make the most of your remote working schedule by not only keeping pace but advancing your learning during this unprecedented time. Keep your cybersecurity planning moving ahead!

Cost-effective, flexible training is available now!
