

Advance Your Cloud Strategy with ORION Cloud Connect

TODAY'S CHALLENGES

High costs, lack of security and unreliability often associated with connecting to the cloud via public internet access points can cause headaches for your institution and pull you away from mission-critical objectives.

Current VPN connectivity solutions can generate significant charges whenever data is retrieved from the cloud. These charges, along with added monthly connection fees, can quickly become unsustainable. Further, many critical business applications require more predictable performance and security from the network than internet-based solutions can support.

ORION'S SOLUTION

ORION Cloud Connect provides dedicated access between your data centre and preferred cloud service provider (CSP), making scalability easier than ever. We help you continue to innovate by reducing capital and operating costs, to help boost institutional agility.

Thanks to ORION, you can leverage high-performance, low-latency connectivity to cloud environments. When you work with ORION, you can reliably and securely access data at cost-effective rates.

Scalable, cost-effective, on-demand cloud connectivity

Cost-savings and increased flexibility

- ORION Cloud Connect allows you to easily scale bandwidth as you grow. Choose the bandwidth that best fits your cloud usage.
- Access exclusive rates to connect quickly and cost-effectively by leveraging your existing ORION network connection.

Speed and reliability

- ORION Cloud Connect gives you dedicated bandwidth with no network congestion for a hassle-free cloud experience.
- Scale bandwidth as you grow, available speeds: 500Mbps, 1Gbps, 5Gbps and 10Gbps.

Enhanced security and vast cloud infrastructure

- Bypass risks of the public internet. Moving from VPN to Cloud Connect strengthens cybersecurity and improves performance predictability to meet your business goals and security commitments.

The value of dedicated, private connectivity to the cloud

Organizations rely on cloud computing to drive innovations at breakneck speed. ORION can give you the leading edge to provide secure, unlimited access to the cloud, to facilitate these discoveries.

Solving the challenges of distributed cloud computing is easy when you have a trusted provider with a network of world-class connectivity services at the ready. ORION provides the support you need to connect to dedicated access to the cloud wherever you are, no matter what stage you are at in your digital transformation.
